PROJECTS

E-Commerce Platform Development, Full Market store

07/2025 – 08/2025

I made this website using for backend Django and SQL lite and I made the frontend using React.js and I did it for one of the people I know but he couldn't afford the server cost and I prepare for him the plan of the marketing for this online store

Award-Winning Front-End Website, Frontend for Market store

- This website I make it for a Challenge and I put on it all that I know in Frontend to make it as perfect as possible I use on it
- HTML, SCSS, Javascript, DummyApi, framer-motion, React and React Router

Digital Citizenship,

Website made to give us some knowledge about Digital Citizenship

- This website for me is the first website I actually make it to break the ice between me and thinking on how to make website with my own and I use on it
- HTML, CSS, Bootstrap and Javascript

Demo Portfolio, Demo Portfolio to get used on React

- This website to I make it to break the Ice between me and React and I use on it:
- HTML, CSS, Bootstrap and React JS
